

ConsumerVision

All-In-One Residential Marketing Masterfile

Buyers, Donors, Subscribers, Online, Mortgage, & More

USAGE

Direct mail, demographic append, move update & data cleansing / hygiene, phantom record identification, customer penetration analysis, phone append & verification, e-mail acquisition, deployment, & append

Overview

CAS has developed the industry's most comprehensive and accurate multi-sourced and data-enriched consumer information marketing database.

ConsumerVision contains many transaction and response-driven elements. Build your custom list with geography along with over 500+ demographic and lifestyle characteristics.

Use it for any marketing program from postal and email direct marketing to customer database enhancement and analysis.

Access valuable information on

nearly 110 million households and 220 million individuals at the individual, household and area level.

ConsumerVision now includes new and previously unreleased consumer interest elements.

The addition of these elements gives ConsumerVision far greater depth in Lifestyle and Interest categories than any single-sourced database.

ConsumerVision takes advantage of being processed against CAS' in-house Change of Address and Postal Optimization products, which are run by its own proprietary CASS Certified Software.
